

NFIRS 5 Alive – One Page Overview

NFIRS 5 Alive is a desktop application that converts raw NFIRS 5 and CAD data into contemporary performance reports. The product features more than 10,000 pre-formatted reports that provide:

- Complete fractile analysis of CAD, Turnout, Travel and response time components using graphs, charts and exports to Excel.
- Performance trend analysis for 3, 7, 30 and 90 days.
- Support of all demand and performance calculations required for accreditation.
- Automatic generation and management of commercial risks.
- Support for 3D geographic modeling of demand and performance using Google Earth.
- Temporal heat map analysis of demand trends in Excel.
- Aid analysis for inter-department / inter-station responses.
- Staff analysis using graphs animated by hour of day and day of week.
- “Live” performance dashboard published and updated hourly on the web.

NFIRS 5 Alive gives decision makers the information necessary to monitor their operation and identify opportunities for improvement. Advanced trend analysis closely monitors performance trends after changes.

Animated Data, Inc. has been publishing **NFIRS 5 Alive** for more than a decade.
